ABOUT ME:

I am a prolific full-stack developer with a diverse skill set in software development, I develop fully responsive applications using modern technologies such as **Javascript Es6+, React.js, React Native, Node.js, Express js, HTML5, CSS3** and a host of other technologies while consistently receiving high user experience score for all my projects. Below, you'd find some personal projects I have completed that showcase my skills and general background in web development.

PROJECTS:

E-Streams | Movies & TV Series (<https://estreams.netlify.app/>)

See the full details & trailers of your favourite movies, latest movies and tv series. It Utilizes the TMDB api so the movies on the application are always up to date!

Developed with: React Js, Javascript, HTML5, CSS3.

Top Invoice (<https://topinvoice.netlify.app/>)

Top Invoice is a web application used to **create, store, manage**, and **delete** invoices for your business. it is an application that is ready for use by businesses or companies!

Developed with: React Js, Javascript, Express js, HTML5, CSS3.

E-Countries (<https://e-countries.netlify.app/>)

This web application contains the details of every single country on earth and 1000+ facts of all countries on earth. Search for any country and get to know more about the country! It utilizes the restcountries **API** to get information about countries via a RESTful API

Developed with: React Js, Javascript, HTML5, CSS3.

Afarmacco (<https://afarmacco.netlify.app/>)

Afarmacco is a full stack application that enables poultry farmers to maintain their day to day operational records and provides industry insights. The application helps to keep basic records of financial transactions and focus on your profitability or otherwise, access market intelligence to drive sales of your birds, monitor and apply medications/vaccinations to secure your birds against diseases and lots more.

Developed with: React Js, Javascript, Node js, Express js, HTML5, CSS3.
